Examiner, Art Unit 3737

1. The following is an examiner's statement of reasons for allowance: the prior art of record teaches a cardiac gating method with a triggering technique in which image acquisition is triggered by a start pulse derived from an EKG taken from the patient while imaging. The prior art of record however does not teach the use of a trigger pulse or a marker-in signal derived from a CT imaging system and communicated to an EKG monitoring device so as to overlay EKG waveform data and indicate the start of a CT scan on the EKG waveform data. Therefore the art of record does not enable an accurate correlation of EKG data and CT projection data since there is a significant delay in time between the collection of the EKG data and the collection of the CT projection data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
